

## Why is Halloween so much fun?

Because you can play dress up! Extend that fun for the special child in your life with a fantasy paper-cut portrait. If you or your child can imagine the fantasy, I can create it. An 8x10 or 10x8 portrait starts at \$400. Please add \$50 for each additional child in the portrait. You can also keep it purely as a fantasy. I also work in acrylics, watercolors, pastels and pencils. If you do not state your prefer medium, I will assume you want the illustration execute in my paper-cut style.

Here is how it works:

1. After discussing what is wanted in the commissioned piece and a fee is settled, I will send you a contract to sign.
2. Upon signing the contract and  $\frac{1}{2}$  of the fee is paid, I will start on a pencil sketch. If it is a portrait, I will need from you at least three photos of the child from different angles, with at least one full-body photo. If you have a specific place you want illustrated, please send those photos as well, otherwise I will make it up according to your descriptions.
3. You are allowed 2 sketch revisions.
4. After a sketch is chosen, I will begin cutting. When the paper-cut is completed (about 2 weeks), I will send an image for you to approve.
5. Upon approval, you will send the other half of the fee and I will send you the final art.  
Kill fee: You may terminate the agreement and not purchase the final art. However,  $\frac{1}{2}$  of the money already paid will not be return for the time I invested in the commissioned piece.
